

# THE CHRONICLE

Provincial Library

Ed

VOL. VIII. NO. 35.

CROSSFIELD, ALBERTA. FRIDAY, AUGUST 27th, 1915.

PRICE 25 CENTS A YEAR.

## LAUT BROS.

NOW that the Season for  
**GRAIN CUTTING**  
is nearing, you had better look your old  
Binders over and let us fit you up with  
**REPAIRS**  
before you get too busy.

Remember, we have both  
**DEERING & McCORMICK.**

The Stock of new binders in the west will  
probably be short, but we are well stocked in  
the meantime and will be glad to demonstrate  
the superiority of the old reliable Deering and  
McCormick Machines to all comers.

If you want a  
**NEW BINDER**  
come in now, or you may be disappointed  
when your grain is over-ripe.

**Laut Brothers,**  
**HARDWARE & GROCERIES.**

## Ivor Lewis

Sole Agent for the Famous  
**GALT COAL**

**Hard Coal and Briquettes always  
on hand.**

**Fire Wood. Draying.**

## Local and General

Mrs. Donald Grant, Music Teacher  
of Calgary, was in town on Friday.  
For appointments write P.O. Box  
621. Moderate fees.

Mrs. Donald and Mrs. Fenwick  
were visitors to Calgary on Saturday.

Mrs. R. L. Boyle and children  
returned to Crossfield on Saturday  
from Banff, where they have been  
on a holiday for the last five or six  
weeks.

We are in the market with highest  
prices for poultry. Shipping every  
Thursday morning.

Farmers Meat Market.

Dr. Whillans has been appointed  
a Coroner in and for Alberta.

Mr. and Mrs. W. S. Smith were  
visitors to Calgary for the week end.

Mr. and Mrs. H. J. Wiggins  
were Calgary visitors on Tuesday.

Mr. and Mrs. Jose journeyed to  
Calgary on Saturday evening. Mr.  
Jose returned on Monday morning.  
Mrs. Jose returning on Tuesday  
afternoon.

Mr. Donald Grant, of the firm of  
A. and D. Grant, Photographers,  
Calgary, was in town last Friday.

We are still open to buy Live  
Stock, and paying highest prices.  
Farmers Meat Market.

Amongst the local prize winners  
at the Edmonton Exhibition we  
notice J. Morrison won the following  
Campions (Silver), Cocks—1st and  
2nd; Hens—1st and 2nd; Cockrels—  
1st and 2nd; Pullets—1st and 2nd.  
Wyandottes, Columbian, Cocks—1st  
and 2nd; Hens—2nd and 3rd; Pullets—  
2nd.

F. Collicutt won a number of  
prizes with his Herefords at the  
Edmonton Exhibition.

Mr. A. Sackett started out on  
Wednesday as Watkin's agent for  
this district. Art. should do all  
right on his new venture, as he is  
pretty well known, and Watkins  
goods are reliable.

Mr. S. Collins was a Calgary visitor  
last week end, spending a couple of  
days with his brother Jack, who was  
expecting to be leaving for the front  
any day now.

Mr. and Mrs. Halliday and family  
left in their auto for a short visit to  
Banff on Tuesday.

Mr. Wm. Laut left for Banff in  
his auto, accompanied by Mrs. Laut  
and her three sisters.

Mr. and Mrs. J. R. Gilchrist and  
family left for Toronto on Wednesday  
afternoon, where they are going  
for a holiday.

Mr. B. Wicks, from Innisfail is  
in charge of the local Depot during  
Mr. Gilchrist's vacation.

A group of boys were out bathing  
and learning to swim a few days ago  
near Crossfield, when one well known  
boy came very near getting drowned,  
on going down the fourth time he  
was rescued by the timely aid of a  
friend, and the unseen hand of God.  
May these boys be more thought-  
ful the next time. It is safer to  
stay on dry land.

The hurricane which recently swept  
over the West Indies, destroyed 90 per  
cent, of the banana trees on the north  
side of the island of Jamaica, according  
to officers of the steamer Commodore  
Rollins, which arrived in New York on  
Tuesday. The steamer brought a large  
cargo of bananas which were cut from  
the trees felled by the hurricane.

## Why Don't You Marry The Girl?

What in the world are you waiting for?

Crops are good and prospect of good times.

## The Mystery of the Ravenspurs

By Fred M. White

Ward, Lock & Co. Limited  
London, Melbourne and Toronto

(Continued)

"Are they different to ours?" Vera asked.

Tchigorosky glanced up. Mrs. May was regarding him with more than a flattering interest. A slight smile, almost a smile of defiance, parted her lips. Marion was looking down at her plate, crumbling a piece of bread absently.

"Come of them," said Tchigorosky. "Some are black, for instance. I have a place in Kent where I dabble in that kind of thing. I have a few of the bees with me."

Tchigorosky took a small box from his pocket and laid it on the table. Vera inspected the black bees for a moment and then handed them back to Tchigorosky.

"By accident or design he let the box fall, the lid flew off and the bees immediately half a dozen small objects were buzzing in the air.

A yell of terror broke from Mrs. May, a yell that rang to the roof. She jumped to her feet only to sink again with the bees in her hand. Vera, she seemed to have lost all control of herself, she turned and addressed Tchigorosky with loud tongue that conveyed nothing to any one except that she was denouncing the Russian in a fury of passionate anger.

Geoffrey had risen, too, greatly alarmed. From the head of the table, Ralph Ravenspurs coolly demanded to know what it was all about.

"The man is mad," Mrs. May cried. "He is a dangerous lunatic. Those are the black bees of Tibet. They are the most fearsome of insects. Ah!"

One of the drinking objects dropped on her hand, and she yelled again. She was a picture of abject and pitiable terror.

"I am doomed, doomed," she moaned. "Killed by a careless madman. Is there any danger?" Geoffrey demanded.

Only the life led among so many perils caused the family to walk calmly for the next and more dramatic development. Perhaps the way in which Tchigorosky was behaving gave them confidence. If he was a madman, Mrs. May asserted, then the madman was wonderfully calm and unafraid.

"You are alarming your mother needlessly," he said. "See here."

He reached over and took the bees from Mrs. May's hand. The insect had become entangled in her sleeve and was buzzing angrily.

"The little creature is furious," he said. "As a matter of fact, they are always more so. I am sorry if there is any danger there is danger now. He held the bee lightly in his hand. Then he released it.

"The stings have been removed," he said. "I freed these myself, and I know how to treat them, and I am sorry to have caused a disturbance."

He spoke with serious, earnest, politeness, but there was nothing light in his eyes as he turned upon Mrs. May. Nobody had a right or a chance for anything else, and the spectacle of Marion trying back half fainting in her chair passed unnoticed.

"Then they are usually dangerous?" Vera asked.

"My dear young lady, they are dreadful," Tchigorosky explained. "They invade other nests and eat the honey as they might have invaded your hives. By way of experiment I tried one of these on your hives to night, and your bees seemed to recognize an enemy at once. They all deserted their hives and not one of them has returned. As some animals for what I have done I am going to send you two of the finest swarms in England."

Vera shuddered.

"I shall never want to see a bee again," she said.

Once more the eyes of Tchigorosky and Mrs. May met. She knew well that Tchigorosky was talking at her through the rest, and that in his own characteristic way he was informing her that the last plot had failed. With a queer smile on her face she proceeded to peel a peach.

"You are so horribly afraid," she said. "I feel half clever of you. But I don't suppose we shall meet again."

"Not unless you come to Russia," said Tchigorosky. "Which is a very morrow. But I am leaving my affairs in competent hands."

Again was the suggestion of a threat; again Mrs. May smiled. The smile was on her face long after the three most interested of the tragedy had left the dining hall and gone to the billiard room for a smoke.

"Are you really leaving us?" Geoffrey asked.

"I said Mrs. May to imagine so," said Tchigorosky. "In a day or so her

spies will bring her information that I have left England. As a matter of fact, I have succeeded in tapping a vein of information that is worth a good deal for a long time.

"Still, I am not going away and my disguise will be the one you saw me in. If luck goes well I shall be attached to Mrs. May in this character of a native servant before long. So if you see any suspicious looking Asiatic prowling about, don't put a bullet into him, for you may kill me by mistake."

Geoffrey smiled and promised.

"That was a rare thing," you gave Mrs. May over the bees," he said. "How did you manage it?"

"I stole them from the woman's spare supply," he said. "I have been all over her possessions today. I almost sufficed the horrible, little things and removed their stings. Of course, they won't live many hours. I did it in a spirit of mischief, intending to release them in my lady's own sitting room. I couldn't resist the temptation to try her nerves tonight."

"You are getting near the truth?" Geoffrey asked.

"Very near it. We want certain evidence to bring the whole gang in to the net, and then we shall strike. If they don't murder us first. But—"

The speaker paused as Vera entered the room. "Where is Mrs. May?" Geoffrey asked.

"She has gone to her room," Vera explained. "Her foot is so painful that she has to go to the terrace for a moment to spend the night here."

"Good," Tchigorosky muttered. "It could not have been better."

### CHAPTER XXIX.

#### Mrs. May at Ravenspurs.

The woman who Mrs. May had lost no time in adapting her to circumstances. That she had found her way out to the terrace for a good purpose was known to three people, although in all probability she imagined that Tchigorosky alone was acquainted with her design.

He had said to her for her and to a certain extent he had forced her hand. But she was too trapful and unscrupulous a woman not to be able to turn misfortune to her own advantage. And was she not here—here a guest among those who had some point of view from her soul?

Why, it matters not for the present. From Mrs. May's point of view Tchigorosky alone knew, and Tchigorosky was going away ere long. But whether Tchigorosky remained or not, Mrs. May could defy him to find out that she was in the house connected with the misfortune of the Ravenspurs.

Once the man she had most reason to dread had withdrawn to the billiard room, the adventures lost no time in ingulating herself with her involuntary hosts.

This was the woman with whom Geoffrey had dined. Vera regarded her curiously. She was very beautiful and fascinating, and she had a manner that attracted. Her conversation was bright and interesting.

"You must not be so hard on her," she said to Vera. "And you must not grudge me a little of your lover's company."

"How did you guess that?" she asked.

"Oh, there are signs, my dear. I know of my own romance and I know. But women of my age can never tell little young girls like yourself. We lack the one great charm."

"I should not have thought so," said Vera.

Mrs. May patted the girl playfully on the cheek.

"That is a very pretty compliment," she replied. "But it does not alter facts. A woman of forty may be fascinating. She has the brilliant parts, but alas! it is only once that she can possess youth."

The speaker turned away with a gentle air and began to discuss the art treasures in the drawing room with Mrs. Gordon. All the time Marion had held coldly aloof from the stranger.

"You are not like yourself tonight," Vera murmured.

Marion's dark eyes were lifted. There were purple rings under those eyes and a hunted expression on the white face. It was the face of one who has a terror that it is impossible to forget.

"Am I not?" she said indifferently.

"Pardon me, but that woman?" Vera asked.

"Frankly, I don't," Marion admitted. "But there are reasons. Strange that you don't recognize the likeness between us. Geoffrey likes me, and I like him. Vera started. Strange, indeed, that she had not noticed it before. And now that Marion had spoken the likeness was surprising. Making allowance for the difference of years, the two faces were the same.

"Is there another mystery?" Vera asked.

Marion smiled like her old self.

"Indeed there is," she confessed. "But it is a poor, vulgar little thing beside your family mystery. Mrs. May is a connexion of mine. As a matter of fact, she is closely related to

my mother's family. She is not a good woman, and I hope you will see as little of her as possible."

"But I suppose she would come to see you?"

"Oh, dear no. She never came here. I should rather, I suppose, her coming here. Beyond question, her taking up her residence for the benefit of her health in this village was simply a coincidence."

Vera looked closely at the visitor.

(To be Continued)

### Not Her Fault

"It is the duty of every man and woman to be married at the age of twenty-two," said the lecturer.

"Well," said a woman of thirty, with some asperity, "you needn't tell me that. Talk to the men."

## Summer Care Of Poultry

### Extra Care Taken at This Season is Well Repaid

When we think of any bravo effort that is made to keep everything spick and span and such careful attention given to the birds in the winter time when eggs are high in price and every effort is made to get many of the birds into the pen, it is surprising that more attention is not given to the flock during the summer season. When the birds are to be sold, the winter eggs are getting their very best prices, and the birds are capable of being heavy producers of just ordinary poorly produced stock. It is only possibly give second-class results.

True, it is that natural condition that is the cause of it. At other times the birds with little effort during the summer when they are more or less at liberty, but they are conditions that arise almost more serious than those that are to be expected. The birds are frozen up and undesirable germ is kept and they have unlimited freedom, usually the birds can look after themselves, but they are not. The birds are to be handled they need closer attention to detail during the summer months than at any time of the year. At this season of the year, the birds are inclined to eat in their labor, on account of the discomfort of extra effort in the hot sun. The birds are to be kept in the closest attention to the little details that will mean so much to the producer. The birds are to be kept in the best condition if we would wish to have the best results the following winter and prepare for better producers for years to come. The subject of this article might be divided into two parts, namely, housing conditions, yard conditions and food. Housing conditions are the most important to the breeder stock and the young chicks. With the former the importance is to be seen that the houses become as well supplied with fresh air all the time as possible. This can be accomplished by removing all windows and making as much of the house as possible open to the air. The drafts on the birds at night. Houses that are closed up much at night, the birds are to be kept in the best condition if we would wish to have the best results the following winter and prepare for better producers for years to come. This can be accomplished by removing all windows and making as much of the house as possible open to the air. The drafts on the birds at night. Houses that are closed up much at night, the birds are to be kept in the best condition if we would wish to have the best results the following winter and prepare for better producers for years to come. The subject of this article might be divided into two parts, namely, housing conditions, yard conditions and food. Housing conditions are the most important to the breeder stock and the young chicks. With the former the importance is to be seen that the houses become as well supplied with fresh air all the time as possible. This can be accomplished by removing all windows and making as much of the house as possible open to the air. The drafts on the birds at night. Silent Parlor Matches

New and Second Hand Safes

Some fine new and second-hand Safes, Cash Registers, Computing Scales, etc., cheap. F. H. Robinson, 60 Princess Street, Winnipeg.

British Heroes

The Brave Six Hundred Who Died in Silence

Writing home to his daughter from the Dardanelles, a member of the French Expeditionary Force describes in a letter, reproduced by the Mail, how he saw H.M.S. Melville go to her doom.

It was about 6.35 a.m., he says, when the battleship was struck. As soon as she was torpedoed by the German submarine she rolled over in an alarming fashion till she had a list of about 45 degrees to port.

Everything on deck fell or slid with a tremendous din and whatever was not attached was thrown into the sea. But I owe to the truth to say that there was not a single instant of panic and that many of the seamen who, recognizing the imminence of the danger, had undressed waiting the critical instant with calm.

They had not long to wait, for four minutes after the explosion the Mail abandoned her fighting position and turned completely over and went down, the forward keel alone emerging.

It was a terrible moment, but it was also sublime when six hundred men, facing death mute and strong, were thrown into the sea, covered and caught in the torpedo nets which ensnared them like an immense cast net among the gigantic eddies of their annihilated battleship.

Hard and soft corns both yield to Holloway's Corn Cure, which is entirely safe to use, and certain and satisfactory in its action.

Just a Sidelight

The manner in which the manufacture of aeroplanes in this country has been quickened by the European war is reflected in the demand for varnish for the machines turned out. A big varnish company had been selling one million dollars of aeroplanes about \$100 worth of its product a year. For the last six months the aeroplane man's purchases have averaged \$1,200 a month, and \$1,200 worth of varnish will go a long way in finishing up aeroplanes.—Wall Street Journal.

Insure Against Air Raids

The British government has completed a plan for state insurance against damage by aircraft and bombardment, in which it will work in conjunction with fire insurance offices. The rates to be charged in all districts will be identical, and for private dwellings are fixed at two shillings per cent against aircraft, and three shillings against aircraft and bombardment.

## Is An Interesting Highway

The Atlantic Sees Strange Vessels During These War Days

The war has brought more than Dreadnoughts into active communication. Any day in the harbor at St. John, New Brunswick, may be seen a number of the old square-rigged Canadian sailing vessels loading up for England.

These relics of the nautical past are helping to fill the gap made by "cruisers of the admiralty." And there is money in the business. For instance, the Canadian timber, for export, have now to pay about \$6 10c. per standard of 165 cubic feet for freight from St. John to old country ports. One old "tab," to use the irrelevant phraseology of the modern, polished officer in the merchant service, was sold not long ago for \$8,000. In one trip about this same "tab" is said to have cleared \$12,000 profit! An iron sailing vessel that cost \$25,000 in saildred have made \$35,000 on its first trip across the Atlantic.

Old "malls" who have been living on shore for many years have again donned their oilskins. A boot and shoe merchant, who had not sailed a ship for twenty years, sold his store, bought an interest in a brig, shipped it himself across the Atlantic, and cleared up \$3,000 in a month. No more boat selling for him, he said. The Atlantic is in the interesting highway these war days.—The Canada Gazette.

Health cannot be looked for in the child that is subject to worms, because worms destroy health by creating internal disturbances that retard development and cause various weaknesses. Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the sufferers are restored to healthfulness, all the discomforts and dangers of worm infection are removed, and satisfactory growth is assured.

British Valor Unsurpassed

British courage was never more gloriously exhibited than it has been by the soldiers and sailors of the empire during the present conflict. The long record of British victories in the past centuries was never embellished by nobler feats of arms than those performed upon land and sea by British arms during the past few years.

French warfare has been the greater glory to Irishmen than the caseless warfare in the trenches of Flanders gives the glory of the Emerald Isle. The courage of Banockburn has carried through the intervening centuries, and the men of Scotland have died at Namur, at Mons and at Ypres even as their fathers did for generations but their name should be kept free. Creely, Pottiers, and Hudson Bay.

Waterloo gave English soldiers no greener laurels for bravery than have George, St. Julien and others. British valour is unsurpassed by troops of any nation that the sun has seen. Kitchener and French and other British commanders have accomplished all that it was possible to accomplish.—Washington Post.

Deafness Cannot Be Cured

By local application, as they cannot reach the diseased membrane, the only way to cure deafness is by a system of treatment that restores the hearing power by means of the natural voice of the patient. This is the only way to cure deafness, and it is the only way to cure deafness.

## Great Britain Getting Inventions

Thousands of Offers Have Been Received Since the War Began

The appointment of an inventions board of scientific men, with Lord Fisher, recently an admiral of the admiralty, as its head to assist the British navy, was largely the result of the suggestion made by Lord Bryce, former ambassador to the United States, to the house of lords and following upon a discussion in which similar proposals were made by Sir William Ramsay and other eminent scientists.

Lord Bryce pointed out that the country needed not only fighting men, but should moulders its inventive ingenuity in chemistry, mechanics, engineering, physics—the whole range of science. While the American navy was a few days ahead of the British in launching this plan, according to the cables, its inception in both cases was due to the lessons of the war.

The admiralty received 16,000 offers of new scientific devices during the first five months of the war. Many of these were of the most valuable kind. Another 16,000 offers were received from Americans. Another 16,000 offers came under the stimulus of the war. Of the first 16,000 a board undertook to sort the wheat from the chaff to eliminate the most valuable and to indicate to the number which, in the board's judgment, were worthy of any attention.

Another board scrutinized these 50 more rigidly, and reduced them to 16,000. The board of inventions was set out with every precaution of secrecy, and every prospect, it is declared, of giving place to the mechanical warfare exceeding anything produced by human ingenuity.

## SYNOPSIS OF CANADIAN NORTH- WEST LAND REGULATIONS

THE sole head of a family, or any  
male over 18 years old, may homestead  
a quarter-section of available Dominion  
land in Manitoba, Saskatchewan or  
Alberta. Applicant must appear in person  
at the Dominion Lands Agency or Sub-Agency  
for the district. Entry by proxy  
may be made at any Dominion  
Lands Agency (but not Sub-Agency), on  
certain conditions.

Duties—Six months' residence upon  
and cultivation of the land in each of  
three years. A homesteader may live  
within nine miles of his homestead on a  
farm of at least 80 acres, on certain  
conditions. A habitable house is required  
except where residence is performed in  
the vicinity.

In certain districts a homesteader in  
good standing may pre-empt a quarter-  
section alongside his homestead. Price  
\$5.00 per acre.

Duties—Six months' residence in each  
of three years after earning homestead  
patent; also 50 acres extra cultivation.  
Pre-emption patent may be obtained as  
soon as homestead patent, on certain  
conditions.

A settler who has exhausted his home-  
stead right may take a purchased homestead  
in certain districts. Price \$20.00  
per acre. Duties—Must reside six  
months in each of three years, cultivate  
fifty acres and erect a house worth  
\$200.00.

The area of cultivation is subject to re-  
striction in case of rough, scrubby or rocky  
land. Live stock may be substituted for  
cultivation under certain conditions.  
W. W. COOK, C.M.G.,  
Deputy of the Minister of the Interior,  
N.B.—Unauthorized publication of this  
advertisement will not be paid for.

## The Crossfield Chronicle

Subscription price, \$1.00 per year in  
advance; or \$1.50 if not paid in advance.

Published at the Chronicle office, at  
Crossfield, Alberta, each Friday.

RATES  
Business locals 10 cents per line first  
insertion; and 5 cents per line each sub-  
sequent insertion.

Legal advertisements, 12 cents per line  
for first insertion; and 8 cents each sub-  
sequent insertion.

Commercial contract rates upon appli-  
cation.

Printer and Publisher.

CROSSFIELD, ALTA., AUG. 27, 1915.

## Anticipating Another Winter in Trenches.

News comes that the French are  
preparing all along the front for the  
winter campaign. In the trenches  
the greatest possible care is being  
taken to protect the men, not only  
against attacks, but also against the  
weather. Tar is being used where-  
ever the intrusion of water is likely  
to occur. Drainage of various kinds  
is being provided, and concrete is  
being freely used.

If it is necessary to make use of  
the same trenches this winter as last,  
they will not suffer so from wet and  
frozen feet, and it will be possible to  
sleep or rest with some comfort. In  
the advanced trenches the use of  
barbed wire is being largely extended.  
The drilling for the posts for the  
wire, formerly done with heavy  
mallets, the sound of which was  
often the signal for a volley from  
the enemy, is now accomplished  
noiselessly by machinery.

## Attack on Belgian Coast

Submarine Base of Germans at  
Zeebrugge Believed to have been Hit.

A dispatch received on Tuesday,  
describes an attack of British war-  
ships on Belgian coast town, says:  
"Aeroplanes, both British and Ger-  
man, took part, and at one time,  
while the coast batteries were re-  
plying to the heavy fire of the fleet,  
fire destroyers were engaged in combat.  
Three were German and two British.  
For a time the latter were compelled  
to perform the dual task of keeping  
the fire informed of the effects of  
the fire and beating off the German  
machines, two of which had been  
sent up to engage the allies' airmen.  
One airman is believed to have fallen,  
but it is not known whether he was  
German or English.

"Eye-witnesses state the bom-  
bardment was heaviest between 6  
and 6-30 a.m. The ships, due to  
morning mist, were able to come  
closer in shore than otherwise would  
have been possible. A large number  
of projectiles were seen to explode at  
Liseweghe, beyond Zeebrugge, caus-  
ing dense clouds of smoke, but no  
fires were visible. The reason for  
this dropping of bombs inland is that  
on the Bruges-Zeebrugge canal, the  
Germans have recently constructed  
an underground submarine haven.

They have excavated under the  
high bank that runs alongside the  
canal a perfect base, leaving the top  
of the dyke as a roof for the sub-  
marine retreat. Nothing of this is  
observable from the air, and aviators  
would scarcely think of dropping  
bombs upon an apparently innocent  
dyke. Under this earthen roof, how-  
ever, five submarines are said to have  
been sheltering.

"Considerable damage has been  
done as the result of the bombard-  
ment, but it is not known whether  
the submarines were destroyed. The  
big naval guns have, it is believed,  
smashed a large portion of the coast  
defence works, the famous Mole  
having suffered, in addition to the  
special works constructed by the  
Germans."

## Good News of Allies In Turkey.

Optimistic reports concerning opera-  
tions on the Gallipoli peninsula have  
been in circulation for the past few days,  
and prophecies are freely made that  
a few weeks will see the close of the allies'  
most difficult tasks in the Near East.  
The Murks, too, expect the Anglo-French  
forces to be successful, if news reaching  
Sofia from Constantinople is reliable.

In fact, it is thought that, so far as  
the Dardanelles is concerned, it is a matter  
of indifference to the allies whether the  
Balkan states lend a hand. Their assist-  
ance is wanted, however, against Austria,  
and also to shorten Turkish resistance,  
if the straits are opened. For these  
reasons negotiations with the Near Eastern  
capitals are being watched with interest,  
and the decision of Serbia on the pro-  
posals of the quadruplets for satisfy-  
ing the aspirations of Bulgaria, which  
it shortly expects. It is believed that  
Srbia's reply will prove satisfactory and  
that Bulgaria's co-operation will be  
assured.

This would open the way also for an  
active policy on the part of Rumania,  
who wants assurances that Bulgaria will  
not attack her before she commences to  
move her troops. It is confidently ex-  
pected all these questions will be settled  
satisfactorily to the allies, and that with-  
in the same period the future policy of  
Greece will be definitely announced.

## THE ARGUMENT IN A NUTSHELL

"Made-in-Canada" Idea in Condensed  
Form—A Simple but Convincing  
Statement

A writer in the University Magazine  
for April attacks the "Made-in-Canada"  
movement in somewhat vigorous fash-  
ion. After commenting on the selfish-  
ness of those who are responsible for  
it he delivers into some economic argu-  
ments, maintaining that if a country  
does not buy it cannot sell, and that  
goods are exchanged for goods. There  
is a certain measure of truth in the  
latter statement, but the "Made-in-  
Canada" argument does not deny this.  
It is a practical policy, dictated by  
motives of enlightened self-interest,  
based on the theory that what is good  
for Canada and Canadians must, in the  
long run, be good for the British Em-  
pire, of which we form a part. The  
"Made-in-Canada" argument is simply  
this:

Canada is a young country, which,  
although it has one of the most modern  
protective tariffs in the world, has  
built up a great national industrial sys-  
tem. For a couple of years the output  
of this plant has decreased because  
the demand for manufactured goods  
has fallen off, with the result that  
many workers are out of employ-  
ment and a great quantity of un-  
sold goods is stored in warehouses.  
Yet we are buying hundreds of mil-  
lions of dollars worth of manufac-  
tured goods abroad. Those who ad-  
vocate the "Made-in-Canada" policy say  
to Canadian buyers: "Before you pur-  
chase an imported article see if you  
can find a similar Canadian article  
which would suit you. You will prob-  
ably find it and you will find prob-  
ably, too, that the quality and price  
compare favorably with the quality  
and price of the imported article. If  
you can discover, in some cases  
that the Canadian article is not quite  
so good or quite so cheap as the im-  
ported article, ask yourself if your  
patronage will help in time to bring  
about a state of affairs where the  
Canadian article would be equal or  
superior to the imported article. Pos-  
sibly, in view of the present extra-  
ordinary situation, you might con-  
cede a little in favor of the Canadian  
article, but we do not ask you to make  
any considerable sacrifice to do so.

If thousands of Canadian buyers fol-  
low this policy, Canadian goods can  
be produced in such great quantities  
that their quality can be improved and  
their price lowered. Canadian raw  
material will be utilized, employment  
will be furnished at home, and our  
foreign obligations will be reduced."

Dr. Samuel Johnson defined patriotism  
as "the last refuge of a scoundrel."  
The man who gets his income from  
this country in a time of war and  
spends a good share of it in another  
is the last kind of scoundrel that could  
be considered a patriot.

## KOOTENAY LAKE, B. C.

Offers many opportunities to the man  
or woman who wants a home or  
make an investment in that prize-  
winning district of British Columbia.  
Those interested can secure the latest  
information, as well as maps, beau-  
tiful three-coloured magazines, regular  
price lists, but first you must know  
you saw this advertisement, the amount  
you have to invest, your nationality,  
reference, and also send a name and  
address of at least ten friends or  
relatives who might be interested in  
buying land in Kootenay Lake district.  
Our ranchers are making from \$250 to  
\$1800 per year off from each bearing  
acre-actual government reports. Land  
selling at from \$50 to \$2000 unimproved;  
improved tracts from \$500 to \$2500.  
No irrigation and its expensive up-  
keep needed here. Plenty of rain; no  
severe cold weather—lake 55 miles long  
and 5 miles wide—never freezes over;  
unexcelled fishing, hunting and heat-  
ing; no crop failure in this year; no  
severe storms such as hail, wind, or  
lightning; no rainy season—its just  
ideal from a climatic as well as its  
financial standpoint.  
Names of reliable real estate firms  
furnished; where to buy the best land;  
what to plant and when to plant it;  
and how to succeed in this year; as  
well as other information furnished  
free. Answer today there is only a  
limited number of maps, magazines, and  
our disposal. Enclose 10c silver post-  
age, etc.

KOOTENAY LAKE INFORMATION  
BUREAU,  
Lock Box 1172 Nelson B.C.

## Fruit Lands For Sale.

SPECIAL—Three colored edition of the  
Famous Kootenay Magazine—50 pages—  
tells who to buy from; best locations;  
best month or year to plant; best vari-  
eties; contains maps and sub-division  
plans; over 100 beautiful photographs;  
nearly 200 questions and answers—all  
about the marvelous Kootenay Lake  
District, Southern British Columbia, and  
how to be successful with fruit, vegetables  
and poultry. Special three-page illustrat-  
ed articles by successful ranchers such  
as Healy and others. Its a summer.  
Regular price 50c. But FREE—just state  
your nationality, amount you wish to  
invest—monthly or yearly—and give one  
reference. Enclose 10c—silver—for post-  
age, etc. Address: Kootenay Lake Infor-  
mation Bureau, Lock box 1172, Nelson,  
British Columbia.

## Estrays.

On the premises of Bailey Bros., 2 miles  
south-west of Airdrie, N.E. Quarter,  
Sec. 3, Tp. 27, Rge. 1, west of 5, 1 mile  
Dark Grey Mare, aged 4 years, weight  
about 1,250 lbs. Branded on right thigh  
JOHN LENNON,  
Brand Reader.

On the premises of Ed. Armstrong,  
Sec. 10, Tp. 27, Rge. 1, W. of 5, 3 miles  
N.W. of Airdrie. One Black Mare,  
about 1,250 lbs., w. on left fore  
foot. Branded on left shoulder. 4  
JOHN LENNON,  
Brand Reader.

Strayed on the premises of Mr. Cal. A.  
Murdock, 7 1/2 miles S.W. of Crossfield.  
One Red Cow about 9 years old, branded  
R2 on right hip. One calf, no visible  
brand. One Red Heifer, one year old,  
no visible brand. One Red and White  
Bull, about 4 years old, no visible brand.  
JOHN LENNON,  
Brand Reader.

On the premises of J. B. Gumsolly,  
N.W. 1/4 of Sec. 16, T. 28-28-4, W. 5th.  
One aged Buckskin Mare, away back,  
branded CX on right shoulder, 4  
on left shoulder.

One Bay Mare, aged 8 years, right hind  
foot white, stripe in face, branded  
on left jaw.

One Dark Brown Mare, 10 years old,  
stripe in face, left hind foot white, striped  
marks, branded Z on left shoulder,  
also 1D on left hip.

One Gelding, light Bay, both hind feet  
white, 3 years old, branded W2 on left  
shoulder.

GEORGE MCLEOD,  
Brand Reader, Crossfield.

On the premises of Jos. Roy, Sec. 33,  
Twp. 29, R. 7, W. of 5, one White Pony,  
weight about 800 lbs., about 7 years,  
fore top clipped, branded C on the right  
shoulder. JOHN LENNON,  
Brand Reader.

On the premises of Cal. Murdock, S. 1/4  
of Sec. 12, T. 28, R. 2, W. 4; one Red  
Steer, aged 2 years, no visible brand.

JOHN LENNON,  
Brand Reader.

There is one thing that no woman  
ever exaggerates, and that is—her  
age.
